Experience

Fresh Consulting

May 2018 - Present

Software Development Lead: Front-end

- Led a year long project of seven developers assigned in three different timezones to launch a 1,500 page enterprise website
- Building websites and applications leveraging modern React tools such as Gatsby.js and Next.js
- Led a team of six developers to adopt best practices and build out workflow enhancements that lead to higher quality code and long term stability
- Advised on project staffing and architecture. Determining what technical stack will work best for the client based on budget and business requirements
- Run weekly developer training to expose development team to new technologies and tools

Fresh Consulting

January 2015- April 2018

Front-end Developer

- Converted static designs into custom-built websites using development tooling such as Webpack, Laravel, WordPress, and React
- Collaborated closely with design to ideate and determine feasibility within budget constraints and provide additional options and recommendations for implementation
- Mentored junior developers on career development path and development best practices to provide a road map to fulfill career goals

SightWorks

April 2013 - January 2015

Front-end Developer

- Developed over ten websites by converting client approved site designs into websites utilizing SightWorks proprietary Content Management System
- Performed manually and automated quality assurance for websites and marketing sites to mitigate defects prior to going to production
- Collaborated with developers and product management team to assess project outcomes and prioritize future project scope
- Evolved the SightWorks Platform with R&D by taking advantage of real-world experience to contribute to enhancements and defect fixes

Education

The Art Institute of Portland

August 2014

Bachelor of Science in Web Design and Interactive Media
